BENEFITS OF EXTERIOR LAMINATES

DURIAN EXTERIOR GRADE COMPACT (FAÇADE)

Laminates (ECGL) is a self-supporting HPL (High Pressure Laminates) which has excellent stability to withstand all shortfalls seen in other external application substrates. ECGL is an ideal option as cladding to decorates the exterior of a building.

PROPERTIES ECGL

ECGL is resistant to ultraviolet, Water, Hail, Adverse Weather, Termite and Borer. It meets the international EN 438 : 6 Plus EG Standard of high resistance to abrasion and color fading in extreme conditions. Since ECGL is delamination-proof, splinter proof and anti-static, it is an ideal product for exterior application.

VARIOUS APPLICATIONS:

FACADE CLADDING

- Balcony paneling or cladding.
- External cladding of commercial or residential building
- Fences, Balcony Railing & Compound Wall Railing
- Entry Gate for Bungalows, Commercial Buildings, Factories, etc.
- Knock down shop, offices, cabins
- Outdoor Furniture
- External Cladding for Shopping malls, Multiplex, Schools, Stadiums, Theaters, Auditoriums, etc.
- Traffic Kiosks
- Bus Shelters

SPECIAL PROPERTIES:

AGEING PERFORMANCE AND WEATHER RESISTANCE

- Durian ECGL can be exposed to any weather conditions i.e. sunlight, rain, and wind
- Exhaust fumes and acid rain can cause mild effect on surface
- Not affected by thermal shock and maintains its physical and mechanical properties
- Chemical Resistant
- Anti Graffiti

DIMENSIONAL STABILITY

- With due conditioning at the site, moderate dimensional variation due to the effects of the atmosphere. It contracts in low humidity and expands in high-humidity environments.
- The compactness of Durian ECGL provides excellent mechanical properties such as tensile, compressive and impact strength. The homogeneity and high density of the panel ensure maximum retention of the screw.
